

WELCOME TO THE COMBINED CADET FORCE

WYMONDHAM COLLEGE

MEET SOME OF THE CADETS:

CSGT E. CAROLL

My A-Level Subjects: Philosophy, English and History
My biggest achievement during my time at CCF: My greatest achievement at CCF has to be attending SCIC (Senior Cadet Instructors Course - where you are taught how to teach other cadets) and finishing as 'best in section'. I overcame a lot of struggles to even attend the course, so to be chosen as the best in section was a really big honour.

FLT SGT H. HUNNS

My A-Level Subjects: Physics, Computer Science, Product Design

Something that I have gained from CCF:

I joined cadets in 2015 and since then have developed multiple skills applicable in both civilian life and in preparation for military life. My biggest achievement was being selected for the Air Cadet Pilot Scholarship last year. With only 20 spaces available every year it is very prestigious and involves two weeks of flying training and a solo flight at Tayside Aviation in Dundee, Scotland.

LT SGT L. ALLOTT

My A-Level Subjects: Government and Politics, French and History

Something that I have gained from CCF: My biggest achievement was completing my Level 3 Eastern Leadership Training. It was an exciting and interesting course where I was able to practise existing skills and learn new ones (like how to cook and sleep outside in a basher).

FLT SGT Z. ABDUL-OBITAYO

My A-Level Subjects: Government and Politics, Psychology and History

My biggest achievement during my time at CCF: My biggest achievement was becoming first aid qualified. This is a really important skill which could one day help me save a life. I was also able to practise this skill even more at a STEM Training Programme which I attended. We went through a first aid simulation where I was able to put my newly obtained qualification to the test.

VOLUNTEERING WITH CCF:

CCF is not just a place which encourages progress and development for the students, but also for the staff who volunteer and participate. There are a wide array of benefits which volunteering at the CCF can provide such as:

Gaining new skills:

Through CCF, there is an opportunity to learn new things and try out new activities. If you read the testimonials and experiences from cadets, you can see the changes and achievements which they have made as a result of participating in CCF. This opportunity to improve isn't solely restricted to students, but also applies to staff who participate.

A whole new side of Wymondham College: As a teacher or a member of staff at a school, you often only see student within certain environments - whether that is the classroom or the boarding house. CCF is an chance to see people in a different environment and see how that affects and changes them. For example: a student may have problems focusing and concentrating in class, but in CCF, they are a useful and capable leader who helps fellow cadets and teaches others.

Meet new students: Members of staff often only get to interact with some students due to a wide variety of factors. CCF is a way to meet new students who might not have the pleasure of teaching. CCF is not only a place of learning, but also a social experience too. You can fellow staff members as well as students who you haven't met yet.

Fun: Last, but definitely not least, CCF is fun. There are range of activities, events and camps to get stuck into. You could attend camps and learn so many new things as well as visit new places. For example: typically CCF has at least two summer camps each year which visit military locations within the UK. CCF has so many fun experiences available.
